EDUCATION

PhD, Instructional Technology Northern Illinois University	In Progress DeKalb, IL
MS, Learning Technologies University of North Texas	2014 Denton, TX
MLIS, Library and Information Studies Florida State University	1999 Tallahassee, FL
BA, French University of South Florida	1993 Tampa, FL

RESEARCH INTERESTS

Some of my interests include: the changing professional identity of faculty before, during, and after a significant curricular redesign; behavioral intention to integrate technology in various educational activities; inquiry-based teaching and learning; multimedia design and innovation; learning analytics; adult learning theory.

ORCID: <https://orcid.org/0000-0001-6765-4015>

EMPLOYMENT

Director of Instructional Design and Learning Innovation University of Illinois College of Medicine	2018-present Chicago, IL
Instructor University of Illinois College of Medicine	2015-present Chicago, IL
Instructional Designer University of Illinois College of Medicine	2013-2018 Chicago, IL

I collaborate with pre-clinical and clerkship faculty to design, deliver, and evaluate curricular content. Part of this collaboration involves determining the most appropriate student-centered instructional design using evidence-based principles. At the university level, I have built up relationships and partnerships with stakeholders across the institution to promote instructional design principles to the design and delivery of curricular content. At the national level, I envisioned a community of instructional designers in medical education. It is now a reality and is a growing part of the American Association of Medical Colleges (AAMC) organization.

Max C. Anderson

5445 N Sheridan Road, #2603, Chicago, IL 60640 | 312.919.5143 | maxlibris@gmail.com | maxlibris.com

As part of program evaluation, I designed a process for observing the facilitation/delivery of case-based teaching and learning activities in order to provide instructors with specific feedback for any needed improvements. I design and deliver a series of formal and informal faculty development activities designed to create stronger communities of teaching and learning. In order to advise and meet the changing needs of faculty and students, I scan and interpret the medical education literature on current instructional design and educational technology theories and trends. I partner with various offices in the college to analyze confidential data on student performance, faculty instruction, curriculum content and delivery, and create longitudinal benchmarks of data for continuous quality improvement. I am an instrumental part of the methodological process of micro-lecture creation; working closely with other multimedia and videography experts at the three-campus level. Along with video, I produced learning materials in a wide range of other modalities including online modules with interactive elements, case-based scenarios, and screencasts.

Assistant Library Director for Educational Technology

2012-2013

Rush University, Library

Chicago, IL

My role at Rush University included overseeing the purchase, implementation, and support of the learning management system and other educational technology like Panopto, Respondus, and ExamSoft. I trained faculty from all four campuses in the use of educational technologies to ensure proper comfort level with them, and to evaluate their effectiveness. I managed seven full-time employees, including instructional designers, support specialists and lab managers.

Technology Coordinator

2008-2012

National Network of Libraries of Medicine, Greater Midwest Region

Chicago, IL

As coordinator for a 10-state region, I created educational content and taught instructional sessions (face-to-face and via online software). The audience for these sessions were other health science librarians and health practitioners. I implemented a technology improvement award, reviewed competitive applications, and monitored awardee progress toward meeting goals and objectives.

Educational Services Librarian

2008-2012

SOLINET

Atlanta, GA

When I first arrived at SOLINET, approximately 75% of our instructional sessions were delivered face-to-face, and 25% via online meeting software. By the time I left, we had turned that statistic upside-down. I developed content and taught hundreds of high-quality instructional sessions either in-person or using distance learning software. This organization covered a ten-state region, my audience was mostly from public, academic, and special libraries. This not-for-profit organization is now known as Lyrisis.

Public Access Computer Trainer

2000-2003

Bill & Melinda Gates Foundation

Seattle, WA

Max C. Anderson

5445 N Sheridan Road, #2603, Chicago, IL 60640 | 312.919.5143 | maxlibris@gmail.com | maxlibris.com

I was fortunate to work for a foundation with the greatest endowment in the United States. In my role, I taught face-to-face instructional sessions to library staff members at rural public libraries across the country. In addition, I installed granted computers and networks in these libraries. At the end of my time with the foundation, I worked with the Alaska State Library to install computers and train staff at remote public and tribal libraries.

ACADEMIC SERVICE

Rush University

- Calendar Committee, Member, 2012-2013
- Room Scheduling Committee, Member, 2012-2013
